

WINNER CLEANING SERVICES

Winner offers cleaning services to aid families at-risk, due to social and environmental health factors regarding the cleanliness of the home.

Our staff will oversee housekeeping and organization to accommodate the family, and/or to satisfy health contingencies of the Division of Child Permanency and Protection (DCPP), in support of children remaining in the custody of the family.

Winner works closely with care management organizations (CMO) by offering lower pricing than outside cleaning services.

HOW IT WORKS

- Winner receives referrals for families that need housekeeping and organizational services
- Families may need cleaning services due to health concerns and/or DCPD involvement
- Senior cleaning specialists sit down with families and assess the current condition
- Cleaning and organizational needs are discussed to create a maintainable and healthier environment
- Cleaning specialists determine the services needed and the time of completion
- Cleaning specialists work with the family to restructure the home environment to a safe condition
- Cleaning and organizational instruction are incorporated into the process to

provide the family with skills to maintain a safe home

- Environmentally friendly cleaning products can be provided to ensure an added level of care

CLEANING ORGANIZATION PROCESS

- Families are prompted to assess the value of belongings they have that are not essential, and need to be discarded or donated
- Visits occur by specialists in an expedited time frame to ensure thorough housekeeping
- When clutter is

a presenting issue, Winner specialists will assist the family in reducing and effectively organizing the environment

- Families participate in the organization process
- Additional service resources will be provided for the family's continued needs

Winner & Associates is also a mental health provider and can contribute to the emotional health and wellbeing of the family. When mental and behavioral health are a presenting issue, Winner can provide therapeutic intervention to address these needs.
